

## Product Information

### Product Data Sheet

# RONOZYME® ProAct (CT)

## Description

RONOZYME® ProAct (CT) is a granulated serine protease preparation (EC/IUB 3.4.21-) produced by submerged fermentation of *Bacillus licheniformis* micro-organism. The average particle size is 500 µm. The colour may vary from batch to batch, and colour intensity is not an indication of product strength.

## Product identification

Product code: 50 1232 5

## Specifications

**Appearance:** beige, coated, non-dusty granulate.

**Protease activity\*:** min. 75'000 PROT/g

\*Declared activity

## Dosage range

200 g per ton of feed, mixed into the feed before any final pelleting of the feed.

## Stability and storage

RONOZYME® ProAct (CT) maintains its declared activity for at least 24 months from the date of manufacture when stored in the unopened original container and at a temperature below 25 °C. Prolonged storage at temperatures above 30 °C should be avoided. The 'best use before' date is printed on the label.

## Uses

As a feed additive.

## Safety

This product is safe for the intended use. Avoid ingestion, inhalation of dust or direct contact by applying suitable protective measures and personal hygiene.

For full safety information and necessary precautions, please refer to the respective DSM Material Safety Data Sheet.
